Office Action Summary	Application No. 09/981,125	Applicant(s) CHERITON, DAVID R.	
	Examiner Jung Park	Art Unit 2616	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Remarks of Pre-Brief Appeal

1. Applicant's arguments, see pages 1-2, filed 11/27/2006, with respect to the rejection(s) of claim(s) 15 and 23 under US 102 rejection have been fully considered and are persuasive. Therefore, the rejection and the finality have been withdrawn. However, upon further consideration, a new ground(s) of rejection is applied with the same reference.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
3. Claims 15-17 and 23 are rejected under 35 U.S.C. 102(b) as being anticipated by Merchant et al. (U.S. 5,408,463, hereafter "Merchant").

Regarding claims 15 and 23, Merchant discloses the system of claim 15 and the method of claim 23. Merchant discloses a packet switching system [and a method] comprising:

- a packet stream splitter (111-1 fig.1); and
- a first filter (101 & 119 within 116-1 fig.1) and a second filter (102 & 119 within 116-N fig.1) coupled to the packet stream splitter (as shown in fig.1), the first and the second configurable filters each including a normal operating state (note: normal operating state is equivalent to working state, therefore, initial state of the filters is normal operating state, otherwise the filter function is not operable);

- wherein the packet stream splitter is configured to provide a received packet stream to each of the first and the second configurable filters (fig.1 where the first interface 111-1 provides a received packet from an input line 110-1 to the first and the second filters); and
- wherein when the first and the second configurable filters are in their respective normal operating states (note: see above): a particular packet is forwarded only by one of the first and the second configurable filters (fig.1 where a particular packet forwarded only by one of the filters) and both the first and second configurable filters are configured to forward at least one packet (fig.1; col.3, ln.55-62 where the both filters forward at least one packet).

Regarding claim 16, Merchant further discloses, "the first configurable filter further includes an all packet forwarding state, wherein the first configurable filter is configured to switch between the normal operating state and the all packet forwarding state in response to a signal (active and standby modes, see col.2, ln.46-49)."

Regarding claim 17, Merchant further discloses, "the signal is generated in response to detection of an error condition affecting a set of packets forwarded by the second configurable filter (col.2, ln.46-49 where the failure of a first active module affects a set of packets forwarded by the standby module)."

Allowable Subject Matter

4. Claims 1, 6, 8-11, 13, 22, and 29-33 are allowed.
5. Claims 18-21 and 24-27 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

6. Applicant's arguments have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of same reference.

At page 1-2, applicant argues, Merchant does not teach, "a particular packet is forwarded only by one of the first and the second configurable filters". In reply, a particular packet is forwarded only by one of the first filter (101 and 119 fig.1) and the second filters (102 and selector fig.1).

Contact Information

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jung Park whose telephone number is 571-272-8565. The examiner can normally be reached on Mon-Fri during 6:15-3:45.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chau Nguyen can be reached on 571-272-3126. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
